

Storyboard TP 2

start page - user clicks start

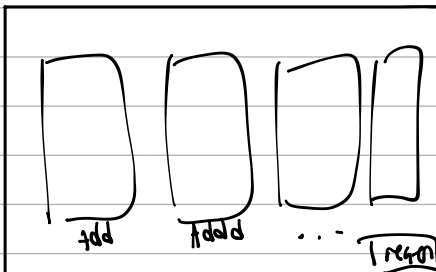

Main page. user has 3 options; add an item (add a file), create an outfit, or look at their closet.

option 1: Add item

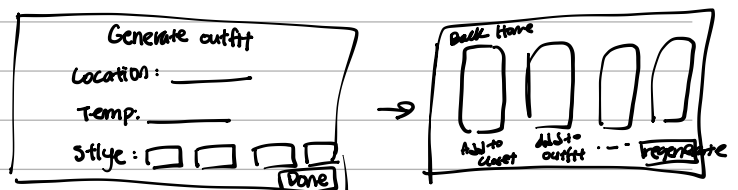

User uploads file name, such as "clothes", then user is directed to the main page

option 2: Create outfit

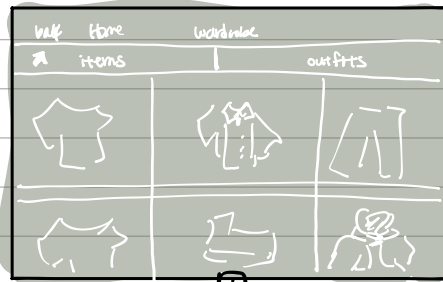

1. Generate one: based on weather and color, user can request for outfit combos. Probably will generate 4

↳ ex. of interface

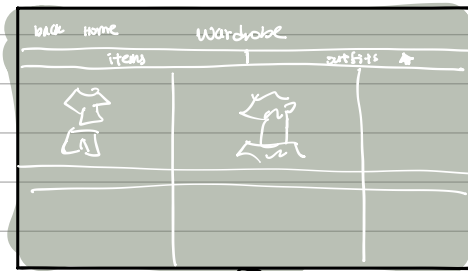

Option 3

user can look at their items

↑ directs to add item page

↑ directs to generate outfit page

If I have time:

- size provider based on measurements
- generate outfits taking into account personal color

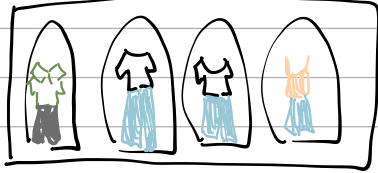

Best Outfit Generator:

Round 1:

pick fav

Ref: 'green', 'blue', 'gray', 'beige', 'white's

Preference: shirt \rightarrow red, well fit

linen \rightarrow loose, white, baggy

$$\begin{pmatrix} 7 \\ 2 \end{pmatrix}$$
